

Summer Programs

Summer is a great time for vacation and fun... but it's also a great time for children to explore areas of learning different than those they are exposed to during

the school year. The following programs are just a sample of the day and overnight enrichment programs throughout the state and region. For a more comprehensive list of programs in other states, please visit the NAGC website www.nagc.org/resourcedirectory.aspx and search for "summer program." If you are interested in any program, be sure not to wait too long before checking it out. Some programs have application deadlines and/or may fill up before the start of summer.
